Resources
Bow saw & tool gloves, Logs, stable base.

Method
1. Your Outdoor Leader should have already taught you the ‘Billhook Introduction’ and ‘Billhook Use’ before you complete this task.
2. Find a partner to work with.
3. Follow the billhook tool use guidance to split the wood in half, then quarters, then eights (or as thin as the wood will allow.)
4. Use this wood for fuel when having a fire. Remember to store it in a cool and dry place.

(Please remember to follow the Fire Pit Policy & Fire Pit RA when having a fire.)
