Use this scenario as a thinking point/starting prompt for imaginative and experiential outdoor play-based learning...

What if...
The Earth lost its gravity

Development Ideas
- What would happen?
- How would you feel?
- What would be the best things?
- What would be the worst things?
- How would it affect our environment?
- What would you need to build/do to survive?

End of session reflection
Can you think of anywhere that has no gravity? Would you like to go there? Why/why not?
